Graphic to consider:

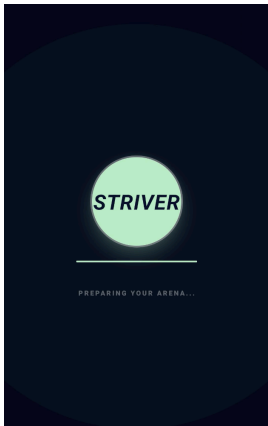

Opening sequence

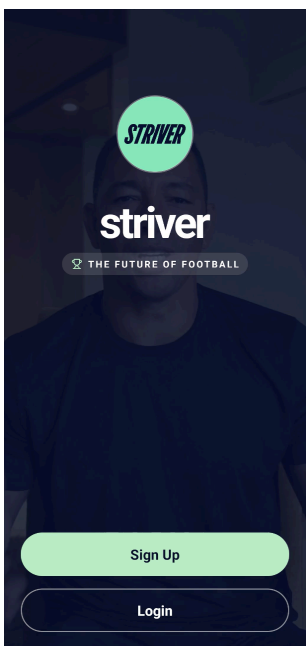

In general this is quite long to get to the point to sign up or sign/in - what can we do to condense

If this is the first thing you see, it feels a bit of a long loading process and not the most exciting. Anything we can do here?

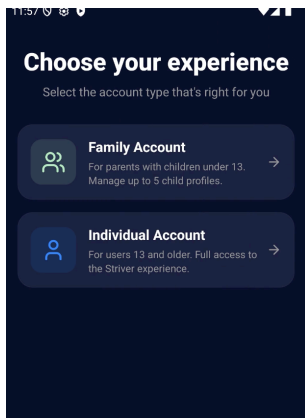

Again this feels like it takes a while. Can we use the correct fonts and logo here please

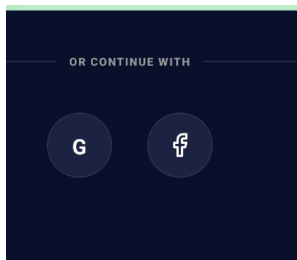

Can we use the correct logo. Also why do we say Striver under a Striver logo? If it's because we want to see Gilberto, can we do an opaque logo? Can we amend the text to say "Football has a new voice". Can we look at a suite of logos that are on brand for us and that we can also use for socials etc. This feels very AI.

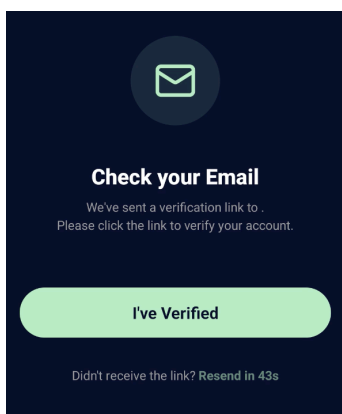

Account sign up

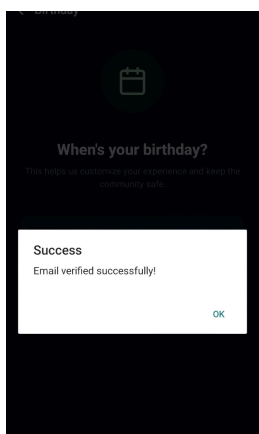

Same point re fonts and icons. I'm not sure re use of blue as a key accent colour for icons, I know we've introduced as part of secondary colour palette.

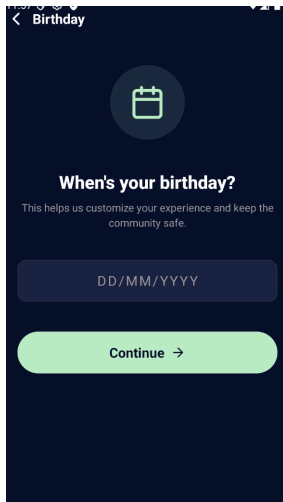

On iOS will we have Apple login option as well?

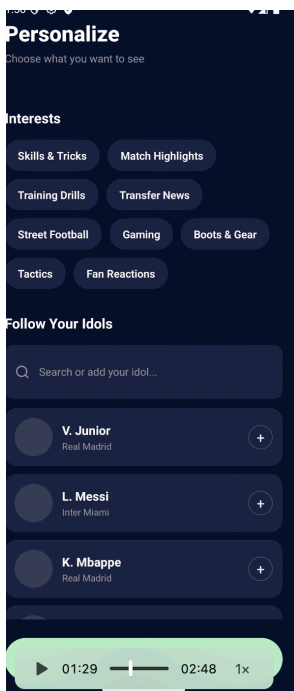

Again icons feel very AI - we need custom icons that reflect our brand personality.

Can we make this fit in more with the style of the app. Also make the copy sound more Striver - “You’re in, let’s go” or “All set, welcome to the team”.

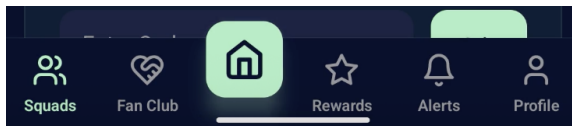

Icon and fonts - use UK English - customise, not customize

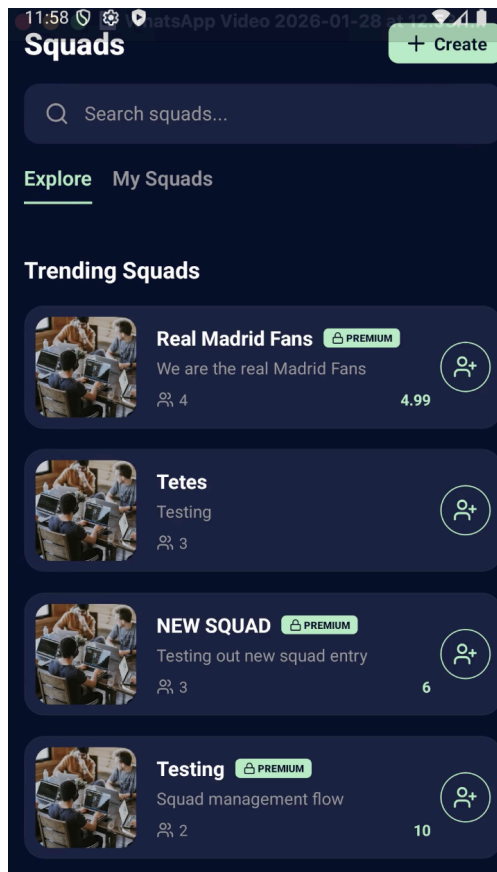

Personlize - should be ‘Personalise’. On the interest categories can we put in “advice” or “tips” - is there a full list of interests anywhere to review?

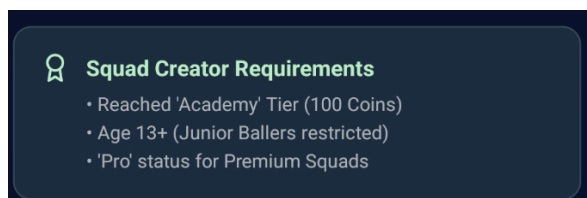

I’m wondering whether ‘follow your idols’ actually is a bit too generic. Perhaps given we are talking to this being less social media and more about education we should go down the “Your mentors” or “Choose your mentors” angle. Also on the follow suggestions, do those update based on the interests you choose? I’m guessing the grey boxes will be images which will make this feel more dynamic.

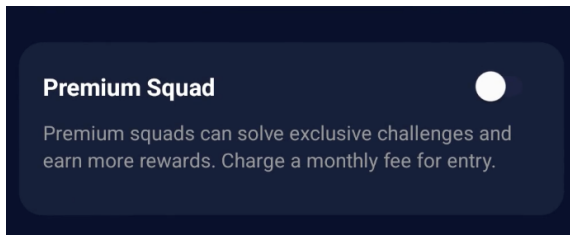

We are using the same icon for squads and for family account. Same feedback re creating something more ownable here.

I see on the premium ones we are suggesting a price. How will pricing work. Will this be regional currency and auto updated based on location and do we have a payment mechanic integrated? Will we also have squads that show up as aged restricted, e.g. 18+ or 'not available in your location'?

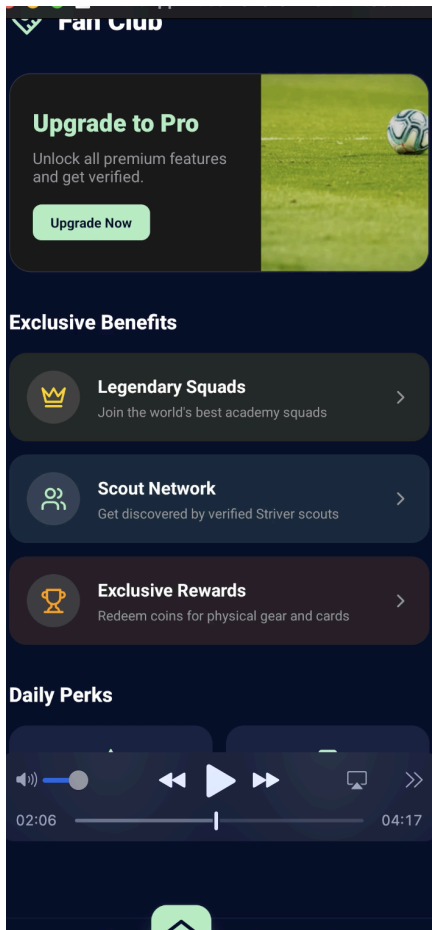

On this we are suggesting you have to be Pro status for premium squads, but on the page before it suggests you can buy your way in, what is the journey here?

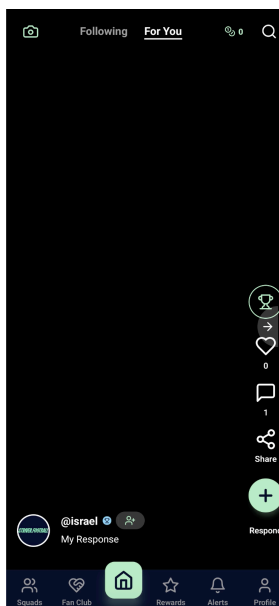

IF someone sets it up as a Premium squad do we explain somewhere the revenue share - a bit like a substack model? Just thinking we will need them to sign terms for this and set up a bank connection, or have the opinion to withdraw.

A mobile app interface for creating a new squad. At the top is a dark blue header with a back arrow and the title "Create New Squad". Below the header is a section titled "Squad Creator Requirements" with a list of three bullet points: "Reached 'Academy' Tier (100 Coins)", "Age 13+ (Junior Ballers restricted)", and "'Pro' status for Premium Squads". This is followed by a dashed border box containing a camera icon and the text "Add Squad Banner", with a small green circular icon with an upload symbol to its right. Below this is a "Squad Name" label and a text input field containing "e.g. Manchester United Fans". Next is a "Description" label and a larger text input field containing "What is this squad about?". Then is a "Premium Squad" toggle switch, which is currently turned on. Below that is a "Privacy & Access" section with a "Private Squad" toggle switch, which is currently turned off. The bottom of the form is partially cut off.

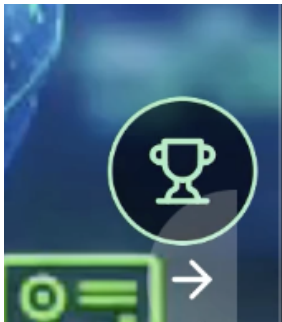

As per comments above, will we be adding in location restriction option, number of people restriction option - e.g set this squad to max 50 people, and age restrictions (beyond being 13 to set up squads, e.g you don't want to join a squad as a 15 year old that is for 18+)?

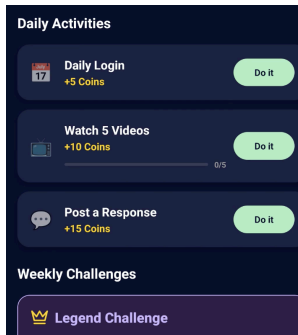

We hadn't discussed Fan Club before. I like the idea, but what sits in here? I think Scout Network is nice but how does this work? Are we just competing with better tools out there? One of our core pillars is the learning and dev side, so should we not be pushing the mentorship side as per the website etc?

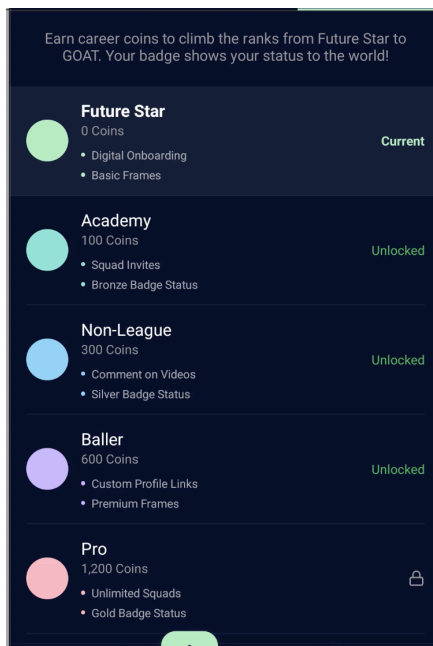

For those under 13 under parental permissions, do we need to restrict sharing for those accounts?

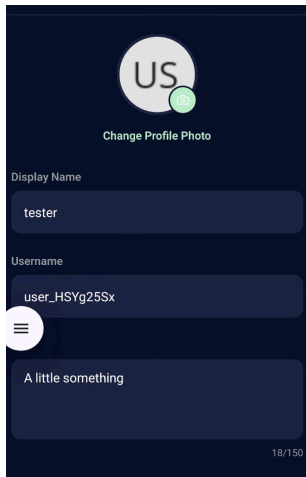

What does this icon mean?

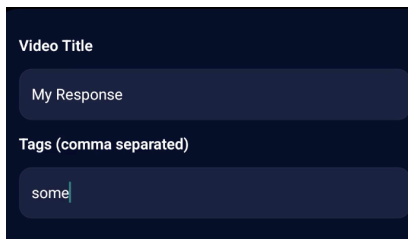

Can we get our own suite of icons

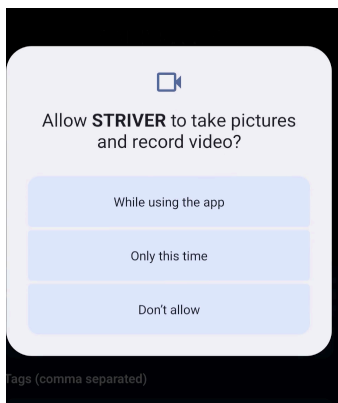

We need to work on what you unlock here Eleanor Hall this needs planning - things like birthday rewards, discounts on in xx etc

Do we want to add, teams you support as an option?

Do we need to say 'comma separated'

Can we make this feel like the same UI family?
